

Joomla template "HOT HOST"

Thank you for downloading templates from HotJoomlaTemplates.com!
Documentation for this template is available online:

1. [HotStart Installation](#)
Install template and create a **copy of our demo** on your server. It's a fresh Joomla installation along with all content and extensions shown on demo. Don't try to install it over existing Joomla!
2. [Regular Installation](#)
It installs template only, **without demo content** and extensions used on the demo.
3. [Module Positions](#)
See graphically presented template layout with all available module positions.
4. [Available typography](#)
Presentation of special CSS styles that you may use on your content pages
5. [Available color styles guide](#)
There are **five** pre-defined styles of this template in template parameters (Extensions > Template Manager > hot_host. You can select your colors and backgrounds for this template in template parameters. However, **please select Custom style in template parameters to make your color selections active.**
6. [HOT Joomla Carousel Pro](#) module guide
7. [HOT Spinner](#) module guide
8. [HOT Joomla Gallery](#) module guide
9. [Top Menu with sublevel](#)
Learn how to create top menu with drop-down submenu effect.

We hope you will enjoy using this template!

If you have any further questions, please post a message on our [support forums](#). Our support staff will be happy to assist you.
